# Saving plots

```
p <- ggplot(iris,aes(Petal.Length,Sepal.Length,color=Species))+  
  geom_point()
```

- `ggplot2` plots can be saved just like base plots

```
png("plot.png",height=5,width=7,units="cm",res=200)  
print(p)  
dev.off()
```

- `ggplot2` package offers a convenient function

```
ggsave("plot.png",p,height=5,width=7,units="cm",dpi=200,type="cairo")
```

- Use `type="cairo"` for nicer anti-aliasing
- Note that default units in `png` is pixels while in `ggsave` it's inches
